### EXCLUSIVE FEATURES OF RADAR SENSOR LED LAMP

- Motion detected: The light will be on when movement objects goes into the effective area, and the light will be turned off after 90 seconds when the object leaves the effective area or keeps motionless. The light will keep working when he (or it) still moves in that area.
- Microwave radar sensor switch is the motion of the sensor, not just the human body, but also the movement object.  
Range of motion detection: 4-5 meters. Easy installation - just like an incandescent bulb.
